

Cold Black Night

Gary Moore

It was a cold black night and the rain was fallin' down
It was a cold black night and the rain was fallin' down
It was a cold back night
The night that my baby left town It was the darkest day and the wind was a-howlin' through
It was the darkest day and the wind came a-howlin' through
It was the darkest day
The day my baby said boo-hoo Come back baby, I never did you no wrong
Come back baby, I never did you no wrong
I been ??? in the front room
Ever since you been gone It was a cold black night and the rain was falling down
It was a cold black night and the rain was falling down
It was a cold back night
The night my baby left town It was the darkest day and the wind came a-howlin' through
It was the darkest day and the wind came a-howlin' through
It was the darkest day
The day my baby said boo-hoo It was a cold back night
It was a cold back night
It was a cold back night
It was a cold back night It was a cold black night and the rain was fallin' down
It was a cold black night and the rain was fallin' down
It was a cold back night
The night that my baby left this town It was a cold back night
It was a cold back night
It was a cold back night
It was a cold back night
It was a cold back night
The night that my baby left town It was a cold back night
