

# Without You

## Small Town Heroes

Up top watching bright city lights  
with you everything just feels right  
as I just hold you tight We take time outside our busy lives  
reminisce all of the good times  
it's been a while since I've felt alive Take your time to notice  
can't forget these moments if I tried  
this just doesn't feel right  
I need you by my side We always knew there was something here  
Feels like a dream it never was unclear  
feels like you never knew  
that I had fell for you  
and we always took our time to get here  
we could run a way we could disappear  
believe me I thought this through  
I just can't live without you Last night it felt like miles away  
oh no I'm feeling cliché  
when you whisper my name  
I'm breathless I can't find words to speak  
countdown to the next time that we meet  
I'm falling and I just can't find my feet I took my time to notice  
Can't erase these memories if I tried  
this still doesn't feel right  
I need you by my side We always knew there was something here  
Feels like a dream it never was unclear  
feels like you never knew  
that I had fell for you  
and we always took our time to get here  
we could run a way we could disappear  
believe me I thought this through  
I just can't live without you I hope a flame burns from these sparks  
I've felt this way right from the start  
When I walk back home without you every night  
a piece of me is left behind  
you're always on my mind We always knew there was something here  
Feels like a dream it never was unclear  
feels like you never knew  
that I had fell for you  
and we always took our time to get here  
we could run a way we could disappear

believe me I thought this through  
I just can't live without you
