

# Guess

## Magnapop

By surprise the fragile fluids that were  
Seem to disappear behind the eye in disguise  
Or how it ought to really ought to be  
Like crystal breaking in a spoon and it's too late  
A finger bends another glass of fruit By surprise I finally see the problems in their eyes  
Or how it ought to be really ought to be  
Behind my eyes a different set of keys A figure A to B  
Are you mean or do you mean goodbye? Are you clear, do you mean goodbye?  
Then they say to you  
Say it here, say it here A different time you stayed too soon  
Or played before I even know  
Say it here, say it here A candle shows the lack of what I need to see to be confused  
But not to use a better friend than  
You're his he finds he stayed too soon or played before I even knew  
I guess it's just of business now, I guess Are you clear, do you mean goodbye?  
When I say  
Say it here, say it here Different time you stayed too soon  
Or played before I even knew  
Are you clear? Say it here
