

# Moon Landing

Sivert HÃ¸yem

Hold on my enemy  
If you've got it in for me  
It's just fog and fantasy  
We'll come to some understanding

I'm going to make this my own moon landing  
I'm going to give this the best that I've got  
You see, right from the start we've been drifting apart  
It's our actual standing  
I'm going to make this my own

Well I don't need no enemy  
To wake me in the night  
No one's gonna go for free  
We'll travel very light

For now I've had enough from you  
I'm done and so are you  
Go see what you can do  
While the universe is expanding

I'm going to make this my own moon landing  
I'm going to give this the best that I've got  
You see, right from the start we've been drifting apart  
It's our actual standing  
I'm going to make this my own

Well, I don't need no enemy  
To keep me awake at night  
No one's gonna go for free  
We'll travel very light

For now I've had enough from you  
I'm done and so are you  
Go see what you can do  
While the universe is expanding  
The silence is commanding

I'm going to make this my own moon landing  
I'm going to give this the best that I've got

You see, right from the start we've been drifting apart  
It's our actual standing  
I'm going to make this my own
