Crawl

Two Tongues

My love, I lack the confidence
To say what's on my mind
I guess I'm prone to shake and sweatConfounded every time
I see you do the things you do
Pale and bright you shineIt goes, I need you here with me
I need you just to see me
I need you here with me
Yet it is only a dream to meI knew that you could save my life
Without a word exchange
Your way with wordsSo insecure
Can barely speak my name
My crumbled spine and faulty lines
I'm sick, I'm small and strangeI need you here with me
I need you just to see me
I need you here with me
Yet it is only a dream to meI saw you standing there
Alone with you guitar
Like I was staring into the mirrorSeeing the same sad scar
I want to reach into you
I want to hold you hereBut the tremors in your body
Make it hard to sleep
Yeah the tremors in my body
Make it hard to speak these wordsI need you here with me
I need you just to see me
I need you here with me
Yet it is only a dream to meI saw you standing there
Alone with your guitar
Staring into the mirrorIt goes I need you here with me
I need you just to see me
I need you here with me
Yet it is only a dream to me
