

# Stars

## We Are Forever

Stars

The mistakes that we've made  
can't be heard  
won't be shared  
can't be told

but we'll hold within ourselves This is my time to realize

that I have not walked on my own

cause my star won't go unknown  
Looking up looking up look at those stars  
looking out looking out look out for ours  
cause I have the brightest star tonight

x2

tonight the light that we've seen is way to bright  
way too far out of sight

but we'll reach it anyway This is my time to realize  
that I have not walked on my own

cause my star won't go unknown  
Looking up looking up look at those stars  
looking out looking out look out for ours  
cause I have the brightest star tonight

x2

tonight We're so close to reaching the stars  
that I can feel your heartbeat

We're so close to reaching the stars  
I can feel you  
Looking up looking up look at those stars  
looking out looking out look out for ours  
cause I have the brightest star tonight

x2

tonight
