The Toy Master

Avantasia

Don't you be afraid
Come and step inside and take a look around
I'm your holy grail in your candy store
To save you from the profound
They use to dream in only black and white
Can't you hear them scream drowning in the tide
Out in the cold I see water frozen in their eyes
What a sorry sight
I am willing to believe they would pay for a smile
I'm the master of toys
and all you girls and boys
are welcome to my wonderland
I'm the angel of joy
and I'm here to paint the void
Welcome to my world
to my dream factory
Say hello to the gentleman with the paint
The deeper you're in the blue
the sweeter the sound of your plaint
If only I had a heart it would brake - Oh, sure
And I wonder how much more they can take
Out in the cold I see water frozen in their eyes
What a sorry sight
I am willing to believe they would pay for a smile
I'm the master of toys
and all you girls and boys
are welcome to my wonderland

I'm the angel of joy
and I'm here to paint the void
Welcome to my world
I'm dealing in pain and little Novocaine
Welcome to my world, to my toy factory
No more struggle of the classes
No more struggle of the masses
On their knees - conformity
They are ready for a hero
They are flying at zero
It's their turn

to crash and burn
No more struggle of the classes
No more struggle of the masses
On their knees - conformity
They are ready for a hero
They are flying at zero
It's their turn
to crash and burn
Master of yer toys
All you girls and boys
are welcome to my wonderland
The angel of yer joy
And I'm here to paint the void
Welcome to my world
I've come to bring your pain
And a little Novocaine
Welcome to my world
