

# I Will Fall

## Sam Palladio, Clare Bowen and Nashville Cast

I'm afraid to go up into the second floor  
If you wanted to work it out why'd you lock the door  
I thought I was good at loving you  
But our light went out when you wanted it to  
I wish you the best, I'm headed west  
it's all I know to do I will fall, I will fall if you come around  
Just when I think my heart break settled down  
I will fall, I will fall if you come around When we said goodbye it was forever  
And I spent the last year piecing my life together  
Just when I think I've let you go  
Your song is playing on the radio  
And just like that it rushes back  
every part of you I will fall, I will fall if you come around  
Just when I think my heart break settled down  
I will fall, I will fall if you come around Oooh, oooh, oooh  
Oooh, oooh, oooh I will fall, I will fall if you come around  
Just when I think my heart break settled down I will fall, I will fall if you come around  
Just when I think my heart break settled down  
I will fall, I will fall if you come around
