Code Breaker

Tunng

Like Watson and Crick
You seem to look
Into my soul
And though my DNA
Is too small for your scope
You make it much deeper

Hydrogen bursts
Inside a star
Don't mean a lot
From whereabouts we are
It's too far for your scope
But you make it much further

Code breaker...

I've searched around
Here for the key
But I'm blind to it
And quantum theorists tell me
They've never seen the likes of your radar

Code breaker...
