Can You Hear Me Now

Savatage

If I closed my eyes
Would it all subside
To an echo in the night
Of a distant fading lightThen a stranger's silhouette
A burning cigarette
And somewhere in the haze
A passage through the mazeCan you hear me now
Or are there just too many doors
Between then and now
For me to ever reach on throughPull you back somehow
That don't happen anymore
Still in the night
I think I hear you callin'I have walked this stage
As the music played
They knew every word
But they never heardFor they never changed
It's all very strange
As I'm standing here
Contemplating yearsCan you hear me now
Are there just too many doors
Between then and now
For me to ever reach on throughPull you back somehow
Well, that don't happen anymore
Still in the night
I swear I hear you callin'Can you hear me now
Or are there just too many doors
Between then and now
For me to ever reach on throughAnd pull you back somehow
But that don't happen anymore
Still in the night
I think I hear you callin'Hear you callin', callin'
Callin', callin'
