

I Will Fall (feat. Clare Bowen & Sam Palladio)

Nashville Cast

I'm afraid to go up into the second floor
If you wanted to work it out why'd you lock the door
I thought I was good at loving you
But our light went out when you wanted it to
I wish you the best, I'm headed west
it's all I know to do I will fall, I will fall if you come around
Just when I think my heart break settled down
I will fall, I will fall if you come around When we said goodbye it was forever
And I spent the last year piecing my life together
Just when I think I've let you go
Your song is playing on the radio
And just like that it rushes back
every part of you I will fall, I will fall if you come around
Just when I think my heart break settled down
I will fall, I will fall if you come around Oooh, oooh, oooh
Oooh, oooh, oooh I will fall, I will fall if you come around
Just when I think my heart break settled down I will fall, I will fall if you come around
Just when I think my heart break settled down
I will fall, I will fall if you come around
