

# Life Changes

## Good Charlotte

[Intro]

Let's go now, it's open season[Verse 1]

Going through these life changes

Gotta keep my feet moving

I'm looking up at the sky

Gotta keep my eyes open

Gonna keep my mind racing

I keep on trying to fly[Pre-Chorus]

We almost died

Learning how to survive the fast life[Chorus]

You know they say that nothing lasts forever

You know they said we'd never stay together

It's a long way down, can't turn back now

Going through these life changes

Going through these life changesLet's go![Verse 2]

Yeah we always try to stand up to the lies

We said we'll never give up 'til we die

And try to help our friends, we learn to live again

We'll never say it's over 'til the end[Pre-Chorus]

We almost died

Learning how to survive the fast life[Chorus]

You know they say that nothing lasts forever

You know they said we'd never stay together

It's a long way down, can't turn back now

Going through these life changes

Going through these life changes[Bridge]

Don't you know that life changes?

You know that love changes

The pain, it rearranges

Best friends become strangers

Don't you know that life changes?

You know that love changes

The pain, it rearranges

Best friends become strangers

So you get up and shake it off

Smile at everyone you meet

Put your best foot forward, chip on your shoulder

It's like you can't be beat

It's like we can't be beatGoing through these life changes

Going through these life changes  
Going through these life changes  
Going through these life changes[Chorus]  
You know they say that nothing lasts forever  
You know they said we'd never stay together  
It's a long way down, can't turn back now  
Going through these life changes  
Going through these life changes  
Going through these life changes  
Going through these life changes  
Going through these life changes  
Going through these life changes
