

Heal Me Kill Me

Shaka Ponk

I'm not here to last and live alone
Heal me or kill me
It's your call
You're a natural born decida
So heal me or kill me
After all We don't need to argue again
We are not gonna shake hands
If it's not love and we're not sure
Let's get it down
Even if you wanna hide your voice
Heal me or kill me
Make a choice Its up to you, its up to you to
Feel me, feed me
Or take off
We don't need to make love again
We're not gonna be just friends
If it's not love and we're not bound Just put me down May be somewhere other places and faces
May be later someone find my pieces
Just let me out or put me down.
Life has just a funny way to make you hope for better
Kiss me and kick me
Out, whatever
Just a funny way to plan the best for later
Maybe... maybe...
For later
We don't need to pretend again
We are not gonna win that game
If its not love and we're not bound
Please put me down
May be somewhere other places and faces
May be later someone will find my pieces
Just let me out or put me down
