## **Move Things Over**

## **Ocean Colour Scene**

I bless you well, wont you move things over?
The night is moving and Ive set my foolish fate
The moon is cold, lets move over
The night is moving and Ive set my foolish fate
So I stop and stareHere comes your eyes, here comes your eyes
Do they really smile? Your eyes really smileAnd the morning sings, it wont give over
The blue awakening comes to your bed
The moon is cold, well, lets move over
The night is filled to the edge and youve said your things
So I stop and stareHere comes your eyes, here comes your eyes
Do they really smile? Your eyes really smileMove things over
Move things over
Move things over
Move things over your eyes, here comes your eyes
