

# Outside Looking In

## Stampin' Ground

I'll find peace within my life  
Without the need to judge my friends  
Before you start your critical preaching  
Remember every carnivore's a potential vegan  
True friends are hard enough to find  
Without adding to the constraints what's in their diet  
And you try to steal away  
Their inherent right to chooseIf all you do is divide and conquer  
Curl up and die, the scene doesn't want you  
I will live my life my own way  
Whilst you crawl away, stagnateYou seek to judge me?  
You don't even know me  
So quick to pass the blame  
Yet you won't even sign your nameThis is not a judgmental song I'm not  
interested in casting stones  
But if SXE is about anti obsession Isn't being  
obsessed with SXE missing the point?Eating your words to save some face  
Your destiny: to fall from grace  
Scene elitists scaring kids away  
With their snobbery and power plays  
I will live my life my way  
While you curl up and dieAnd every time that  
They force their views  
Someone else will lose  
The right to choose  
There is room for  
Everyone in this scene  
Pointless divisions  
Are all your cliques mean
