Blacklisted

Punch Cabbie

Blacklisted in this town
The change was undeniable
Fire and brimstone raining down
It feels unrecognizable
It's all ahead of you
You can't hold me responsible
You have to break the rules
You can be so predictableAll I once knew
Now is fading
Everything disintegrating
In the silence
Everlasting
Like a galaxy collapsing
Don't - be - afraid
Don't be afraidI held on to your hand
It made me feel much better
You try to understand
You are my guilty pleasure
All the mistakes I've made
I got so self-destructive
You have to have some faith
Everyone gets corruptedAll I once knew
Now is fading
Everything disintegrating
In the silence
Everlasting
Like a galaxy collapsingHow'd you fade out
Out of contact
When you disapear on impact
When you break down
Playing too bad
If you leave now you can go backDon't - be - afraid
Don't be afraid
Don't be afraid
Hold your faithNo, you can't surrender
You can no longer
At the end of certified standards
What doesn't kill you
Will make you stronger

When it gets you, you'll discoverSo take courage
Take your chances
And one day you will find your answersThe world is spinning
On its axis
And your galaxy collapsing
Just can't defy it
Or at least deny it
You are born and you start dyingThough it all seems
Mystifying
All I know I can't stop trying (3x)
