

All Along

Remedy Drive

It's not everything it seems, the world and its dreams
Slipping like water through my hands tonight
All the things I thought would fill me up inside
Left me empty here and now I know why All along I was looking for something else
You're something else
All along I was looking for something more
You're so much more
I finally found what I could never see before
You've always been the one that I was looking for All of my castles in the sand, washed away again
And I'm left right where I began tonight
The only thing that can ever fill me up
Has been right in front of me all the time All along I was looking for something else
You're something else
All along I was looking for something more
You're so much more
I finally found what I could never see before
You've always been the one that I was looking for And I won't miss you, I won't miss you this time
And I said I want you, how I want you in my life All along I was looking for something more
You're so much more All along I was looking for something else
You're something else
All along I was looking for something more
You're so much more I finally found what I could never see before
You've always been the one that I was looking for
I finally found what I could never see before
You've always been the one that I was looking for
