

Good Stuff (feat. Ragheb Alama)

Shakira

Tell me all your wishes
I am here to make them true, don't wonder
You don't have to rub a lamp
'Cause I'll take care of you Nobody knows, nobody knows
Nobody knows, nobody knows Tell me what you think I'm one the kind
You know a girl like me is difficult to find
I bet you've never seen nothing like this before
I bet you've never met someone who loved you more You know that I'm a witch and I can read your mind boy
Where do I have to sign
I'm on a board My new resolution is to trust you
My business to love you until you've had it
I'm not gonna miss out on the good stuff
The grass is much greener with us on it Better than to sail on the Mediterranean Sea
Better than to get a fancy Gucci dress for free Don't think it over
Think it over
Don't think it over
Think it over Totally up to you, what you do with me
I'm gonna make it up to us and you will see
Don't have to prove it, it is written in your eyes
Tonight you'll be the winner I will be the prize You know that I'm a witch and I can read your mind boy
I know just what you want,
And I like that My new resolution is to trust you
My business to love you until you've had it
I'm not gonna miss out on the good stuff
The grass is much greener with us on it Watch my body get low uh
As low as it can go uh
All the boys will follow uh
I'll show you something you don't know Watch my body get low uh
As low as it can go uh
All the boys will follow uh
I'll show you something you don't know 'Cause I know what you want
And I like that My new resolution is to trust you
My business to love you until you've had it
I'm not gonna miss out on the good stuff
The grass is much greener with us on it My new resolution is to trust you
My business to love you until you've had it
I'm not gonna miss out on the good stuff
The grass is much greener with us on it
