Hot Summer Night

Chris Thompson

The mercury's rising
And there ain't no disguising
What you do do do do to meIt won't stop raining
And there ain't no explaining why I feel,
Feel, feel a warm summer breezeOh babe you make me feel like it's a
Hot summer night
Even though it's the middle of the winter
And it's really bad weather
It's a hot summer night
When I'm next to you, babyThe weather is frightful
But if you stay for the night
It'll be like a long, long, long day at the beachDon't let it go to waste
Cause, baby just a taste
Would be sweeter, sweeter, sweeter
Than a Georgia peachOh babe you make me feel like it's a
Hot summer night
Even though it's the middle of the winter
And it's really bad weather
It's a hot summer night
When I'm next to you, babyOh it's a hot summer night
Even though it's the middle of the winter
And it's really bad weather
It's a hot summer night
When I'm next to you, babyI took my temperature and told my brain to rearrange
Cause the thermometer was saying something very strange
Outside my window it was lookin like a winterland
But here inside, we were lovin' in the sand on aHot summer night
Even though it's the middle of the winter
And it's really bad weather
It's a hot summer night
When I'm next to you, baby, babyIt's a hot summer night
Even though it's the middle of the winter
And it's really bad weather
It's a hot summer night
When I'm next to youIt's a hot summer night
(Hot summer night)
Baby, it's a hot summer night
(Hot summer night)
It's a hot summer night

(Hot summer night)
