

# We're Into Something Good

**Roy Orbison**

I never thought it could be like this  
Give me another kiss if you don't mind, one more time  
To flatter you with many stories  
Used clinches that would be boring  
Would just waste time, precious time  
I don't have to say a thing  
It's written on my face  
Any doubt that you still have  
Let our love erase  
We're into something good and you know it  
Yeah, we're into something good, don't be afraid to show it  
We're into something good, baby  
I don't see how you conceal it  
There's no way that you can't feel it, when we do what we do  
Now you can't get this close to me  
Send all these vibrations through me

And not know what to do  
So wipe the tears away  
Don't be afraid of me  
Love between us should come  
Oh, so free and easy  
We're into something good and you know it  
We're into something good, don't be afraid to show it  
We're into something good, baby  
We're into something good, baby  
We're into something good and you know it  
Yeah, we're into something good, don't be afraid to show it  
We're into something good, good and you know it  
Oh, we're into something good, don't be afraid to show it  
We're into something good, good and you know it
