

Painkillers

Cherry Monroe

Suddenly I'm alone again
Suddenly I have to pretend
That we're in love soaring high above the atmosphere
But I can't see clear, but I can't see clear I need painkillers just to be, just to be with you
I'll take painkillers just to be, just to be with you
Let's lie beneath the stars and cry
When I get down I get high But suddenly I'm yours again
Suddenly I have a friend
But suddenly I can't get no satisfaction
All from a chemical attraction, all from a chemical attraction I need painkillers just to be, just to be with you
I'll take painkillers just to be, just to be with you
Let's lie beneath the stars and cry
When I get down I get high
When I get down I get high
I get high, I get high, I get
I get high, I get high, I get high, I get I need painkillers just to be, just to be with you
I'll take painkillers just to be, just to be with you
Let's lie beneath the stars and
Let's lie beneath the stars and
Let's lie beneath the stars and
Let's lie beneath the stars and
Let's lie beneath the stars and cry
When I get down I get high
