

Can't Break Me Down

Exilia

What you say isn't what I need
Take a chance, did you ever have a dream?
You cut me to the core
Don't wanna hear no more Every time that you built me up
You had to knock me down
Every time, but I've had enough
Take your best shot now You can't break me down
You can't push me around
Still I stand, still I stand
You'll never conquer me You can't break me down
You can't push me around
Still I stand, still I stand
You won't be conquering me Hide your face, cover up yourself
Do you have a soul in your body left to sell?
You cut me to the core
You can't hurt me no more Every time that you built me up
You had to knock me down
Every time, but I've had enough
Take your best shot now You can't break me down
You can't push me around
Still I stand, still I stand
You'll never conquer me You can't break me down
You can't push me around
Still I stand, still I stand
You won't be conquering me
Won't be conquering me You can't break me
You can't break me down
You can't break me You can't break me down
You can't push me around
Still I stand, still I stand
You'll never conquer me You can't break me down
You can't push me around
Still I stand, still I stand
You won't be conquering me
You won't be conquering me You can't break me
You can't break me
Still I stand, still I stand
Still I stand
