## Hive

## Nonpoint

GoIt's time to do a quick rewind To find another line and bring it back To get the juices flowing You, you found infection with injection Tell me liesTime is moving faster You were the last one to reach inside And grab my soul and kill it Now you realize what you've done Now you realize what you've done Your time has comeGo Pick it up, pick it up, pick it up Tell me what got this funky fail into Gonna feel that in your head and explode Change your home Bring yourself running for the sweet hiveHeart beats, pain inside You wonder why you can't breathe You're about to see your maker's eyes That breath you took was terminal ill Now you realize what you've done Now you realize what you've done Your time has comeGo Pick it up, pick it up, pick it up Tell me what got this funky fail into Gonna feel that in your head and explode Change your home Bring yourself running for the sweet hiveI got this funky fail into Gonna feel that in your head and explode Change your home Get yourself running for the sweet hive Here we go
