Levitibus

Canibus

take it in spoils...and step by step you'll weaken and the power is gone"
Levitibus..
I harness The power of the chakra
with remote reviewing in the darkness describin what I see in the process
stone statues surrounded by neolithic objects
ceoglyphs on the pompa
a dose of the palamine, niggaz will feel like a dream
the dreamstate is the playground for the supreme
critics attempt to follow a trend
today they call me a Charlotten but tomorrow I will be a God of men
to create a universe all I need
is 1000, trillion, trillion degrees
so with 22, betatrons in the cloud chamber
keep the noice down so I dont arouse my neighbors
got a message from the falcon in the snow man
another note in a Coca Cola can
showed the whole planet in coded program
enrypted by a pro-scan modem with a lowband
hold up, let me load it in
"Darling I am a scientist..(you're a person, you ought to think that)
vaporizin my spit and turnin liquid to gas
None of this is (are you going to put a curse on me?)(there's no need)
vaporizin my spit and turnin liquid to gas"
I was created by intelligent design
you are merely a descendant of the unmodified
you diss me out of pride
but when youre finished talkin bout money and bitches youre simply out of rhymes
even my worst album was sublime
if I dont slow down, i'll distort the timeline
back through the time, turned into a 100 bars again
a master like the honorable Earl of Cannaben
the grand architect
used to be a partisan to LeMarketson's theory but I lost the bet
no regrets, you live and you learn
I'm through givin advice, I just give concern

sterilize my hands to prevent catchin the germs
and try to rebuild all the bridges I've burned
I prefer modesty over con-troversy

but what am I to do when these jerks keep botherin me
jealius 'cause they cant rhyme like me
and they never had a scientific mind like me
"Darling I am a scientist..(you're a person, you ought to think that)
vaporizin my spit and turnin liquid to gas
None of this is (are you going to put a curse on me?)(there's no need)
vaporizin my spit and turnin liquid to gas"
I'm above average with verbal semantics
the aurora borealis in the form of a rap ballad
they look at me like "poor bastard
why cant you manipulate billboards with all your metaphor magic?"
no matter how hard I practiced
every microphone I saw I grabbed it
obviously thats the wrong tactic
I went through a long period of mourning and sadness when I wrote that Stan shit
but if you wanna see some hardcore Canibus just say so
and i'll come out the eggroll with seven death scrolls
if you can find a better flow?
then I can find a dinosaur on the Galapagos archipelago
hey you shouldnt fall for the naivette
lyrically I'm the illest when my beats is ok
food for thought, nutrition for the whole brain
keep your neurotransmitters warm on a cold day
I'm ahead of my time, or so they say
I guess thats why I already feel old and grey
okay, thats enough knowledge for today, I'm killin em
you best not forget it 'cause this is Levitibus
"Darling I am a scientist..(you're a person, you ought to think that)
vaporizin my spit and turnin liquid to gas
None of this is (are you going to put a curse on me?)(there's no need)
vaporizin my spit and turnin liquid to gas"
