

# Quality of Life

## Hellions

[Verse 1]

So if I've got your contempt, then know you've got mine  
Covet a home of trinkets, living supine  
So tell me what is real and all that constitutes that  
A collared man breathes on your neck, they're on your back  
In fact, fuck that: I pity you[Chorus]  
Validation, valediction  
What's the difference now?  
Eschew the standard  
Turn the paradigm upside down  
You could be happy, if you wanted to be  
Don't feel obliged to live a life you never wanted to  
The best way out is straight through  
Let intuition guide you  
You could be happy, if you wanted to be  
But you know that you don't[Verse 2]  
Don't you pay no heed to those who take no liberties  
The way of the sheep is not for me  
(Behind your walls, you cannot see)  
I'm glad you met the standard  
So pleased you met your quota  
It's myopic  
Hand in your pocket  
Mind on your wallet  
Fuck that I pity you  
Live for you[Chorus]  
Validation, valediction  
What's the difference now?  
Eschew the standard  
Turn the paradigm upside down  
You could be happy, if you wanted to be  
Don't feel obliged to live a life you never wanted to  
The best way out is straight through  
Let intuition guide you  
You could be happy, if you wanted to be  
But you know that you don't[Verse 3]  
(Back) So bring it back to me  
(True) So tell me honestly  
(When) My friend, don't lie to me

Did you ever really love everything that you did  
And everywhere that you've been?  
Are you just scared to live?  
So don't accuse me of living a life I'll regret  
I'm not a hypocrite - another marionette  
So hold your hands high  
You abide by your strings in the sky  
Dancing to a preordained lie  
You're a marionette[Chorus]  
Validation, valediction  
What's the difference now?  
Eschew the standard  
Turn the paradigm upside down  
You could be happy, if you wanted to be  
Don't feel obliged to live a life you never wanted to  
The best way out is straight through  
Let intuition guide you  
You could be happy, if you wanted to be
