Trilby's Piano

The Who

Your mother loves her brother
But her brother loves his lover
And his lover is my cover
My one and only other - my angel

My angel Trilby
Who said I will be
What I should still be
Genius would fill me - she loves Hymie

Only one Hymie
No one else on earth could ever blind me - like this
Or even find me - such bliss
If you were gone
You'd still be here

Only one Hymie
Why can't they see that life excites me
This boy ignites me
His family fights me
But he's still here

Only one Hymie...
