One Love

Sheena Easton

I know he's so romantic
And he's such a sexy fool for passion
The word is out, his love is magic
And he knows just how to hit the spotGirl, you gotta take time
'Cause love is so blind
There's been so many women
Standing in lineI swear if he really does care
He'll leave all of his women
The only thing that matters girl is justOne love, forever stay in control
The only thing that matters girl is just
One love, it's better girl, just say no
The only thing you'd better say is no, no, noI know you can't imagine
That you'll find another fool for passion
No doubt, he loves like magic
And he knows just how to hit your heartGirl, you gotta take care
'Cause love is unfair
He's got so many women
You'd better beware nowI swear if he really does care
He'll leave all his women
The only thing that matters girl is justAll you need is one love, just one love
One love is better, no doubt about it, baby
One love, oh, one love, one love
Forever straight from the heartAll you need is one love, just one love
One love is better, no doubt about it, baby
One love, oh, one love, one love
Forever straight from the heartAll you need is one love, just one love
One love is better, no doubt about it, baby
One love, oh, one love, one love
Forever straight from the heartHey Sheena, one love is better than two
'Cause if he's messing around
Take it from the Deele, he's gonna loseAll you need is one love, just one love
One love is better, no doubt about it, baby
One love, oh, one love, one love
Forever straight from the heartAll you need is one love, just one love
One love is better, no doubt about it, baby
One love, oh, one love, one love
Forever straight from the heart
