Lights in the Sky

Saxon

Woah oh oh oh oh
Woah oh oh oh ohSilver ships across the sky
Something I have never seen before
Was it true or fantasy
I don't know the answers anymore
All I know is what I saw
Something shooting fast across the skyDid we see a rocket ship from another star
Shooting through our galaxy coming from afar
But I see your lights shining in the sky
Woah oh oh oh oh oh, shining in the skyLeave your signs across the land
Mysteries, the answers that we seek
Coming from another world
See the circles in the golden [incomprehensible]
One day soon we'll talk to you
Find out if you come to us in peaceDid we see a rocket ship coming from afar
Shooting through our galaxy from another star
But I see your lights shining in the sky
Woah oh oh oh oh oh, shining in the skySilver ships across the sky
Something I have never seen before
Was it true or fantasy
I don't know the answers anymore
All I know is what I saw
Something shooting fast across the skyDid we see a rocket ship coming from afar
Shooting through our galaxy from another star
But I see your lights shining in the sky
Woah oh oh oh oh oh, shining in the sky
Woah oh oh oh oh oh, I see your lights shining in the sky
Woah oh oh oh oh oh, shining in the sky
