Everything Is Different Now

Stellar Kart

All alone
It's confusion
All the guilt
And all the blameI was lost and afraid
I was praying
I was hoping
For an end to the pain
Oh how my heart was broken
What a sad sad song
But that was yesterdayEverything is different now
You're the love
I've finally found
Everything is different now
Because of youIt's beautiful
How you surround me
Pull me in
And don't let go
I am yours til the end
I am caught in your gravity
I'm not going back
To the way that it used to be
A sad sad song
That was yesterdayEverything is different now
You're the love
I've finally found
Everything is different now
Because of youEverything is different now
Because of you
Everything is different nowI am yours forever
You have my heart
You have meEverything is different now
You're the love
I've finally found
Everything is different now
Because of youBecause of you
Because of youEverything is different now
You're the love
I've finally found
Everything is different now

Because of you(Hey)
