

More Than Five (feat. Chachille)

Souleye

Verse 1

Many wonder can it get them /
Any closer as if its not waiting /
Thereâ€™s a weight thatâ€™s dropped /
Enter into the book of the dead /
I see the look in your face a little frozen /
Motionless movement / Think itâ€™s a time for conference /
Dig through your mind who are we calling /
Go ahead saw a cobra and an eagle man /
Double headed with a fine tooth /
Never when there running are they /
Really ready we can go bet our money /
On the motor mouth /
Spit it out divided no need to conquer /
Star studded they coming they coming to capture /
Release /
Maybe they are motivated by the force /
Of mother nature I donâ€™t want to be the one /
To find out / Collect rain in a cup for lunch /
Sprout the rest douse the set / Left the room soaking wet /
Slept under an oak / Built a moat around my castle /
Rode an asteroid / Flip a coin, take a pick /
Flying on a jet drink water on the moon /
Fortified by the fire from the hot lava /
After 30 minutes Iâ€™m in it ready to get up /
Out of my skin become birds of the flock of the feather /
Iâ€™ll never be a Nebuchadnezzar insanity pure blue stone /
Abstract contact buzz ahead through a day /
Hey teammates clean slate with a full tank /
Purple yellow contrast in the spectrum /
Iâ€™m seeing the light break down /
Even if I never had a moment of clarity /
Could it really be this reality thatâ€™s real to me /
Take your pick letâ€™s go and see /

Verses 2

In the clutch and hold of heaven thereâ€™s a mannequin /
A group of kids caroling / Singing and doing their dance /
Motivated by the particles articles written on a barnacle /
Nautical not now hold up / Iâ€™m dropping in /
Slide down on the water in the winter when it freeze up /
Can I get an amen strike now with the kingpin /
Looking up high down at the sky below /
Living in the feeling of a fantasy /
Itâ€™s crawling on me like a centipede /
Center peace, send peace to enemies /
End of the internet, have we met yet /
Hello to moment un-code it if it is coded / Bye bye
Three elves and myself walk no shoes /
Barefoot bi-polar bear / Cold is the air /
No one is here there anywhere look around /
Go ahead tell me what you see now /
Hands start to melt / Rocking the bells /
Locked in a dark knock on the door /
Been here before / Used all the words /
Thoughts that occur shifting the curse /
Darker than night in a jungle with a blindfold /
Head in the ground I can hear your heart beat /
Make a rap to it / Write a poem leave it by the window /
Outside by the weeping willow where the black widow /
Would of went / Nonchalant the charge in this /
Sunset watch it fade now /
Where it goes I never went and followed /
Just me myself and my shadows /
In the spectrum /
Iâ€™m seeing the light break down /
Even if I never had a moment of clarity /
Could it really be this reality thatâ€™s real to me /
Take your pick letâ€™s go and see /

Verse 3

In a parallel universe / Thereâ€™s another version of
Myself Iâ€™ve seen / He walked down the street with a canteen /
He thought he was but he couldnâ€™t be /
Cut a corner off split it with the first three /
People that he meets living in a country /
Close enough to his own residence /
He resides in a place that he designs /

Defines until he finds a way out /
Then again heâ€™s lost he canâ€™t stop /
The part of him that wants to be a monument /
His face etched in to a monolith /
A God complex nation raised him /
A patient to pay checks /
No wonder so many want to be leaving the planet /
To inhabit a pattern of habits /
And feed a little cabbage to rabbits /
A savage who would rather be unaccountable /
Out of control / Chaotic addict a mad hatter who /
Who had a dab of the data /
Inadequate not enough to get him going /
Exposure to the solar plexus /
Can you catch this boomerang /
Watch it come back around /
Duck down /
More than five dimensions /
The wish list keeps adding on extensions /
Ascension never will have exceptions /
Move on to the Counter-Earth /
Thereâ€™s a phoenix on the rise in the distance /
Sun burst feel the life force /
Through the tunnel / Watch the shadow as it grows in contrast
In the spectrum / Iâ€™m seeing the light break down /
Even if I never had a moment of clarity /
Could it really be this reality thatâ€™s real to me /
Take your pick letâ€™s go and see /
