

The World Is Dead

Call Me No One

The day burns out whats left of us now
Why dont you see what you mean
Force feed the lie and believe
That blood is ours and its everywhere
The whole world is dead
The world is dead
The whole world is dead
The world is dead
Its all yours now
Save face, bow down
Why dont you cover your scream
Change something real and well see
That life you fake died so easily
The whole world is dead
The world is dead
The whole world is dead
The world is dead
The whole world is dead
The world is dead
The whole world is dead
The world is dead
The whole world is dead
The world is dead
The whole world is dead
The world is dead
