I Found In You

Sarah Darling

Looking back in my life
Getting past the pain
Picking up the pieces
To find a reason to start again
From the first time that I saw you
There was something in your eyes
You knew that I was waiting
There was nothing for me to hide
So many night's I'd spend alone
I cried myself to sleep
There was my salvation
Standing right in front of meAs long as I have a voice
I'll sing it where ever you are
Nothing can change a love song
To tell the world what's inside of my heart
You have given me back a reason
To believe a dream can come true
All that I'd thought I'd lost
I found in youIsn't it amazing
How love never fits
Surviving time and distance
You can count on saving graceIt's like you've always been there
Waiting patiently
I wandered through the shadows
But somehow I found me
I understand what made me strong
The times that I've been through
Now that love is on my side
I can face the world with you
