

Take Care Of Your Woman

[Roy Orbison](#)

Take care of your woman, don't treat her mean
Make her feel like a woman and she won't ever leave
When She's walking in the darkness, be the light she needs
Give her dreams for tomorrow and she won't ever leave
Take care of your woman and make her know that you
care
Let her know that you love her, you want her, you need her and she'll always be right there
Through the storms
of emotion be the calm that she needs
Be a rock of devotion and she will never leave
Take care of your woman and make her know that you care
Let her know that you love her, you want her, you need her and she'll always be right there
Through the storms
of emotion be the calm that she needs
Be a rock of devotion and she will never leave
