

More Than Everything

Roberta Flack & Peabo Bryson

Long before the first beats of our hearts
Somehow someone knew that you belonged here in my arms
And now that I've gotten you girl I'm amazed every day
How you make my life complete in every way But when I start to question just how on earth you found me
All I really have to do is stop and look around me He shows the rivers where to run, struck the match that lit the
sun
He writes the songs the birds sing, makes the flowers bloom in spring
But of all the things He's done, He made me for you and you for me
And that's more than everything My hearts telling me each time we touch
This love has always been bigger than the both of us
As I look into your eyes, darling, now there's no doubt
I know you're the one thing I could never live without I'm forever thankful for all the gifts in my life
And I feel there is someone smiling down on us tonight He shows the rivers where to run, struck the match that
lit the sun
He writes the songs the birds sing, makes the flowers bloom in spring
But of all the things He's done, He made me for you and you for me
And that's more than everything But of all the things He's done, well, He made me for you and you for me
And that's more than everything, more than everything
