Believe

Paul Renna

It started off
When we met
Life was frozen as we kissed
I held you tight
Under silver skies
Life was frozen in the night
So believe believe
When all that's left is love... believeLets run away
To a place
Where the angels sing and we may
Carry on and before to long
Life was frozen in your songSo believe believe
When all that's left is love... believe believe
When all that's left is love
We will be together tonightLet's hold the stars wherever we are
And this moment it could be ours
So believe believe
When all thats left is love
Believe believe
When all that's left is love
We will be together
Believe believe
When all that's left is love
