

# Fantasia

[Ton Koopman](#)

Welcome to my world, close the gates  
You've come from far away, I've been expecting you  
You are the holders of the key to the story that never ends  
Fantasia, resides deep in your heart  
Leave your worries far behind  
Fantasia, let the freedom ring the bell  
Let us all unite, borders made of hate are gone  
Nations singing the song of peace in Fantasia  
How would it be? A world without hate  
Without heaven, without hell  
No wars, no arms, no religion, no God  
Just your own truth  
Fantasia can arise in you  
Fear and darkness prevail  
But finally they will fail  
Fantasia, resides deep in your heart  
Leave your worries far behind  
Fantasia, let the freedom ring the bell  
Let us all unite, borders made of hate are gone  
Nations singing the song of peace, Fantasia  
Fantasia, one day when love conquers all  
Mankind will prevail, no more jealousy  
Fantasia, no more envy no deceit  
The nothing is gone, future's bright and glorious  
We are all victorious, we are kings in Fantasia
