

Soul Killing

The Ting Tings

If this is what it is
And if that's what we're about
Well, we never break the rules
And we never let it out It's soul killing
Might as well shoot me down
Might as well shoot me down
It's soul killing
Might as well shoot me down
Might as well just shoot me If you always have to wait
Well, in then this moment will be gone
Is this what you really want?
You should never say never
Never ever, come on They can never hold us down, they can never hold us down
If you're from a big city, or you're from a little town
They will never hold us down (shoot, shoot, straight) Slowly falling, straight down the middle
Stand up, straight as a ruler
Honest, act like a diamond
It's best, even if falling
That if you're constantly stalling
Honest, I shine like a diamond It's soul killing
Might as well shoot me down
Might as well shoot me down
It's soul killing
Might as well shoot me down
Might as well shoot me They could never hold us down, they could never hold us down
If you're from a big city, or you're from a little town
