

# Too Much To Think About

## The B-52's

Flashes in the sky  
Exploding like a nebula  
Well, it all seems so simple  
And then it's pounding in your brainStokin' and strokin'  
I'm hypnotized  
We're in deep as the night  
When bodies collideI never felt this way before  
And it feels so strange  
Who knows where love goes?  
Who knows when it wraps around your brain?Too much to think about  
Stokin' and a strokin'  
Just too much to think about  
Heat up the night  
Just too much to think about tonight  
Tonight when bodies collideToo much to think about  
Stokin' and a strokin'  
Just too much to think about  
Heat up the night  
Just too much to think about tonight  
Tonight when bodies collideLightning clash, crash across your mind  
So intense no sense but feeling fine  
Movin' in closer, ridin' the tide  
We're in deep as the night  
When bodies collideI never felt this way before  
And it feels so strange  
Who knows where love goes?  
Who knows when it wraps around your brain?Too much to think about  
Stokin' and a strokin'  
Just too much to think about  
Heat up the night  
Just too much to think about tonight  
Tonight when bodies collideToo much to think about  
Stokin' and a strokin'  
Just too much to think about  
Heat up the night  
Just too much to think about tonight  
Tonight when bodies collideI can see so many crazy figures in my dreams  
Oh, my goodness  
It's just too much to think aboutToo much to think about

Just too much to think about  
Just too much to think about  
Stokin' and a strokin'  
Just too much to think about  
Heat up the night  
Just too much to think about tonight  
Tonight when bodies collide
