

Farside of the World

[Ayreon](#)

A black shadow is crawling like a deadly spider
We're all waiting in silence for the lonely rider
For he will lead the way, for he will save the town
We have to leave today, before the moon is down I'm haunted by dreams of a holy mission
I follow the signs of my magic vision
We have to dig a hole and he will be our eyes
We have to reach a goal, before the sun will rise Journey to the far side of the world
No one will catch me when I fall
Follow the trail of fire
No one will hear me when I call Journey to the far side of the world
A distant place, a future time
We'll climb the tallest spire
I will raise the cross and the bells will chime We'll pass over the river to the silver tower
Run before the clock strikes the final hour
He saw it in a dream, he knew he had to die
We never heard him scream, we never heard him cry Journey to the far side of the world
Make them believe the dream is true
Follow the trail of fire
The moon came down, my time is through Journey to the far side of the world
This is the way it was meant to be
We'll climb the tallest spire
The shadow is gone, the town is free Journey to the far side of the world
The moon, the moon came down
Follow the trail of fire, it was meant to be
Journey to the far side of the world, journey is free
We'll climb the tallest spire
