

# I'm With the Pilots

## Ladytron

Time in hands, with the pilots and the traveling bands  
When you're down there, don't feel down an' out  
You have something you can smile about  
Coke or gin  
Why are you boys frownin'? Have you lost something?  
The solution that you have for me  
Will invalidate my guarantee Sell something to someone you love  
Not someone that you don't  
Even though Six O four Belgian teachers and the cosmonauts  
When you're down there, don't feel down an' out  
You have something you can smile about  
Holding hands, rocket scientists revise their plans  
The solution that they have for me  
Will burn me up on re-entry Sell something to someone you love  
Not someone that you don't  
Even though
