

# My Car

## Atlas Sound

Streetlights on, the night air's cool  
I'm driving right past my old school  
I'm looking for my pack of cigarettes  
I'm thinking back on things I've done  
    I can't forget the stupid ones  
    It seems I do my best by accident  
What's that sound? What's that song?  
    What's this street I'm driving on  
        In my car, in my car?  
I miss her feel, her touch, her taste  
    I feel the distance everyplace  
This distance can't be taken casually  
    I take my time, just drive around  
        Feeling lost in my hometown  
    Every turn I take is comforting  
What's that sound? What's that song?  
    What's this street I'm driving on  
        In my car, in my car?  
I'll take a break from all their big plans  
My first mistake was listening to them  
    I made a mess it's all been proven  
        Over and over again  
        Over and over again  
Streetlights on, the night air's cool  
I'm driving right past my old school  
Looking for some face I can't forget  
    I take my time, just drive around  
        Feeling lost in my hometown  
    Every turn I take's an accident  
What's that sound? What's that song?
