Light & Day

The Polyphonic Spree

Light & day, is more than you'll say
'Cause all my feelings are more
Than I can let by or not it's more than you've got
Just follow the day, follow the day and reach for the sunFollow the day and reach for the sun
You don't see me fly into the red, one more you're done
Just follow the seasons and find the time, reach for the bright side
You don't see me fly into the red, one more you're nuts
Just follow the day, follow the day and reach for the sunFollow the day, follow the day and reach for the sun
You don't see me fly into the red, one more you're done
Just follow the seasons and find the time, reach for the bright side
You don't see me fly into the red, one more you're nuts
Just follow the day, follow the day and reach for the sunFollow the day, follow the day and reach for the sun
Follow the day, follow the day and reach for the sun
