

Skeletons

Breathe Carolina

We're face to face
Sorry to wake you I just had to
What's done is done
Now that I'm sober I just have to tell you
All that I had to hide
You deserve the truth
I must've love, close enough
It's what I have to do
You need to hear
You need to hear this all from me
Skeletons in my room
I laid down my love for you
Second thoughts will be the death of us
And I don't want the death of us
If I can change
If I can change
I know I'm better
(With you on my side)
If I can change, can I change your mind?
If I can change, can I change your mind?
If I can change, can I change your mind?
I know I'm better with you on my side
If I can change, can I change your mind?
If I can change, can I change your mind?
If I can change, can I change your mind?
I know I'm better with you on my side
These words will stay here
I hope behind and not between us
With this we're free now
I'm where I am and you're the reason
(Whoa oh)
You should know that you saved me
From a place that I never would've left alive
You've got my heart and it's racing
I'm pacing back and forth
Skeletons in my room
I laid down my love for you
Second thoughts will be the death of us
And I don't want the death of us
If I can change
If I can change
I know I'm better
(With you on my side)
If I can change, can I change your mind?

If I can change, can I change your mind?
If I can change, can I change your mind?
I know I'm better with you on my side
If I can change, can I change your mind?
If I can change, can I change your mind?
If I can change, can I change your mind?
I know I'm better with you on my side
If I can
Take all these skeletons
Lay them to bury them
Take all these skeletons
Lay them to bury them
Can I change your mind?
And bury them
Can I change your mind?
And bury them
Can I change your mind?
And bury them
You on my side
Skeletons in my room
