Planet Earth

Eskimo Joe

Outside a marketplace on earth
There's a subject we all talk about
It's called girls and how they work
Last night while walking in the park
A strange kind of thought occurred to me
So I went to your house and told you
There is a place where people go
And it is worth its weight in gold
Out in the stars, up in the sky
There's a thing that they all talk about
It's called the opposite and how it works
Last night while walking past your house
I came across a man who said to me
It's out in the stars, up in the sky
There is a place where people go
And it is worth its weight in gold
They call this place the planet earth

Where you just know you're not the first
Oh, It's a low, it's a low, it's so many
Oh, It's a low, it's a low, it's so many
Oh, It's a low, it's a low, it's so many
Oh, It's a low, it's a low, it's so many
Oh, It's a low, it's a low, it's so many
Oh, It's a low, it's a low, it's so many
Oh, It's a low, it's a low, it's so many
Oh, It's a low, it's a low, it's so many
Oh, It's a low, it's a low, it's so many
There is a place where people go
And it is worth its weight in gold
They call this place the planet earth
Where you just know you're not the first
Where you just know you're not the...
Where you just know you're not the first
