

Revolution... Revolucion

Ill Nino

We are given this knife, now we're taking their life
The pact is made, we sold our souls for nothing more
The strands of life were once frayed
And now we're sacred and afraid
Living out the dreams that seem to be delayedQue somos libres pero un cancer
You say that you have found the answer
The future's not for me in your society
The light you see is never what it seems to beConfusion, illusion
The nation that you took from me
Is one in which I won't burn
Because you won't learn that this is my
Turn to returnYou can't sell us what you steal
We won't buy what isn't real
Our lives aren't secure
Our hearts won't endure
Fuck you and your wayY mi futuro es negro, que yo soy un peligro
The vision that is sold just never seems to grow
The life that you cannot mold
Tu dices que es tu dolor
The fact is played, the story's old, I'm fucking coldTo be like you and have your actions
To buy into the new perceptions
Of how my life should be, the vision I should see
The future and the light is not what seems to beConfusion, illusion
The nation that you took from me
Is one in which I won't burn
Because you won't learn that this is my turn to returnYou can't sell us what you steal
We won't buy what isn't real and
Our lives aren't secure
Our hearts won't endure
Fuck you and your life
Fuck you and all your waysRe re re re
Revolucian, revolution
Revolucian, revolution
Revolucian, revolution
Revolucian, revolution
Revolucian, revolution
Revolucian, re
