Life In A Dangerous Time

Cutting Crew

Put it down to the fighting
Put it down to the fools who play in the game
I'm picking up second sight
I'm picking up tired ways
But you better believe it
Oh you better believe before it's too late
I'm feeling like letting go
Of living in a dangerous timeIt must've been lonely
It must've been cold
It must've been something
My life in a dangerous time
Is there life in a dangerous time?Coming out of the shadows
Coming out of the darkness into the light
It's bright enough to show the way
Enough to face another day
It's a curious feeling
It's a feeling of reaching up to the sky
I'll never think of letting go
Of living in a dangerous timeIt must've been lonely
It must've been cold
It must've been something
My life in a dangerous time
It must've been something
My life in a dangerous timeI can't help this fear of falling
