

# Textbook Under The Sea

## We Are Scientists

Falling over backwards for you  
Falling over everybody else  
I put myself in that position  
Every single time I have the chance  
I know it's not my business, to be  
Digging up these things I shouldn't know  
But twenty years of bad decisions  
Haven't taught me much at all  
Separate events you're making  
Everyone pretend it's not your fault  
And all of this offence you're taking  
Doesn't really bother me at all  
Twist my arm if that's the way you think you're gonna work this whole thing out  
You know you own my body but don't think that you control my mouth  
Having every question answered  
Isn't gonna help at all? [x3]  
Having every question answered  
Doesn't help  
When you're not supposed to know  
You're not supposed to know  
  
You're not supposed to know  
Anything  
Another textbook situation  
Everything I think I know I've read  
What's the point of medication?  
Only makes me wish; that I were dead  
It's pretty clear that you are me  
It's written here on every single page  
I'm smitten but not stupid  
I can read it all over your face  
Having every question answered  
Isn't gonna help at all? [x3]  
Having every question answered  
Doesn't help  
When you're not supposed to know  
You're not supposed to know  
You're not supposed to know  
Anything

You're not supposed to know  
Anything
