You Never Say

The Ettes

Bet you never met yourself a little girl like me
Every single day it gets easier to believe
When I come at you your bones just fall apart
Give me your hand let's make a new startYou never say
Just who you are
Let yourself go my little girl
And you'll go farEverything about you screams I wanna disappear
But something keeps you around and that's why you're here
I'm not a stupid girl, I'm not your enemy
Get yourself together and then set yourself free
