We Don't Need You

Against All Authority

don't ask for what i won't give watered down rebellion to $ell to the kids i'm frustrated 'cause i keep myself down but i've been moved by the movement and possessed by the sound and we don't need you because the meaning gets lost in the translation and i can't explain it to you your motives you can't hide because i've seen it before and it's like the rising tide and you say i'm stuck in the sand plain' basement shows across the land
