

Elvis

The Rubens

Truth be told, I want to grow old with you, with you
Cause' what we've got, is all that I want it's true
It gets easier to love you
And sometimes it's hard but we've made it this far, we'll get through
And I don't know why sometimes I upset you
It gets easier to love you
Oh people say, we'll marry one day, someday, one day
But don't hold your breathe, there's loads of time left
Let's stay young, let's stay young
It gets easier to love you
And sometimes it's hard but we've made it this far, we'll get through
And I don't know why sometimes I upset you
It gets easier to love you
It gets easier to love you
And sometimes it's hard but we've made it this far, we'll get through
And I don't know why sometimes I upset you
It gets easier to love you
